

§ 58-3-72. Premium deficiency reserves.

(a) In determining the financial condition of any casualty, fidelity, and surety company and any fire and marine company referred to in G.S. 58-7-75, and in any financial statement or report of the company, there shall be included in the liabilities of the company premium deficiency reserves at least equal to the amounts required under this section. The date as of which the determination, statement, or report is made is known as the "date of determination."

(b) For all recorded unearned premium reserves, a premium deficiency reserve shall be calculated to include the amount by which the anticipated losses, loss adjustment expenses, commissions and other acquisition costs, and maintenance costs exceed the sum of those unearned premium reserves and any related expected future installment premiums as of the date of determination.

(c) Except as provided in subsection (f) of this section, commissions, other acquisition costs, and premium taxes do not have to be considered in the determination of the premium deficiency reserve, to the extent that they have previously been incurred.

(d) Except as provided in subsection (f) of this section, no reduction shall be taken for anticipated investment income in the determination of the premium deficiency reserve.

(e) For purposes of determining if a premium deficiency exists, insurance contracts shall be grouped in a manner consistent with the way in which such policies are marketed or serviced.

(f) If the Commissioner determines that the premium deficiency reserves of any company that have been calculated in accordance with this section are inadequate or excessive, the Commissioner may prescribe any other basis that will produce adequate and reasonable reserves. (2001-223, s. 1.1.)
